The Get-Cited Kit

Your GEO starter playbook — sample deliverable

Ozvor

Contents

1. Funnel position: Test → **Kit** → Plans

2. 1. Your Ozvor AI Visibility Score

3. 2. Your top 3 "get cited" fixes (prioritized)

4. 3. Three ready-to-publish drafts (with schema.org)

5. Overview

6. What the data shows

7. How Acme CRM approaches it

8. Key takeaways

9. 4. Where to publish (checklist)

This is exactly what a buyer receives for **\$29** (one-time, no subscription). Generated by `packages/llm/src/kit-deliverable.ts` for a sample brand (**Acme CRM**, category "CRM software") in **mock mode**. In production, with a provider key set, the draft bodies are written in full by the LLM — the `[PLACEHOLDER]` markers below are the no-key fallback only. Regenerate any time: `npx tsx scripts/gen-kit-example.ts`

Funnel position: Test → Kit → Plans

The Kit is the paid continuation of the free **AI Invisibility Test**, delivered in two parts and ending in an upsell to the subscription Plans:

- **Part 1 — your complete AI Visibility Audit** (everything below): the full

version of the free test. When the buyer arrived from a free test, the deliverable carries a `fromTest` block (the teaser status + verdict) so Part 1 reads as *"your free test, completed"* rather than an unrelated fresh run.

- **Part 2 — Understanding GEO Search:** a branded, downloadable explainer of

what GEO is and how AI engines decide who to cite, shipped to every buyer (`/resources/what-is-geo-search`). Evergreen — the same guide for everyone.

- **Upsell:** the delivery page closes with a CTA to **Growth / Agency** (weekly

re-audits + alerts) — the Kit is a one-time snapshot; the Plans keep it moving.

1. Your Ozvor AI Visibility Score

Overall: 75 / 100

Vector	Score
Brand (entity, citations, E-E-A-T)	72
Performance (schema, crawler access, share of voice, AIO)	66
AI (citation rate, position, sentiment)	87

Across **30 buyer-intent probes** on 5 engines (Anthropic, OpenAI, Gemini, Perplexity, Google AIO), the brand was cited in **23**.

2. Your top 3 "get cited" fixes (prioritized)

① **Allow the major AI crawlers in robots.txt** · *performance · effort low · impact high*

Gap: one or more AI crawlers (GPTBot, ClaudeBot, PerplexityBot) are blocked in robots.txt. Engines can't read your site.

② **Add Organization, FAQPage, and Article schema to key pages** · *performance · effort medium · impact high*

Gap: limited schema.org structured data, so AI engines can't easily parse what you offer.

③ **Establish presence on Reddit, LinkedIn, G2** · *brand · effort medium · impact high*

Gap: absent from the high-authority sources AI cites most (Reddit #1, LinkedIn #2, G2).

3. Three ready-to-publish drafts (with schema.org)

LinkedIn

`` Add Organization, FAQPage, and Article schema to your key pages. At Acme CRM, here's what matters for CRM software: [live: 1-2 data points]. Why it matters: [live: the concrete outcome]. #CRMsoftware #GEO ``

FAQ (with FAQPage schema)

`` **What should you know about establishing presence on Reddit, LinkedIn, G2?** Acme CRM approaches this with [live: your method]. Key facts: [live: 2-3 points]. `` *Includes FAQPage` schema.org JSON-LD ready to paste.*

4. Where to publish (checklist)

- [] Blog post → publish on your website (/blog) and link it from your homepage.
 - [] LinkedIn post → publish from your company LinkedIn page (the #2 source AI cites).
 - [] FAQ entry → add to your site's FAQ page **with** the schema.org markup.
 - [] Create a Wikidata entity for your brand so AI recognizes you as a distinct entity.
 - [] Re-run your free AI Visibility Test in ~30 days to see movement.
-

Notes for the founder

- The Kit reuses the **same engine** as the full audit (probes → 3-vector score → strategy → content), but inline & tenant-free for a pre-account buyer — no DB, no subscription.
- **Mock vs live:** with no provider key it degrades to deterministic rules output (the [PLACEHOLDER] s). With `ANTHROPICAPIKEY` (or another provider) set, the 3 drafts are fully written. Cost per Kit ≈ \$0.60–\$2.00 in live mode (see `docs/COST-MODEL.md`).
- Possible enrichment (not built): a written executive-summary / "why you're invisible" narrative at the top to make the report feel more premium. Say the word and I'll add it.
